Introduction

A bingo game that is played throughout a live session using common virtual session occurrences.

Necessary tools (what you need)

- Pick a videoconferencing tool.

Steps

1. Design and distribute the bingo cards. Individual files can be sent or virtual links can be shared. Give instructions as needed. Keep in mind, getting Bingo could involve 1 line, 2 lines, etc.
2. During the session, allow participants to note when they see something on the bingo card. This might be in Chat or verbally. It's key to announce and allow everyone to mark their card to avoid disputes later, plus everyone marking items stays true to the original bingo play.
3. When someone gets Bingo they announce it. Award prizes as needed.
